

Energy at the Museum of Science & Industry

Tuesday 24th January 2012
15:30 – 18:00

Museum of Science and Industry
Liverpool Road
Castlefield
Manchester
M3 4FP

Background

The Electricity Gallery, Gas Gallery and Power Hall at MOSI explore the major developments that have led to our current energy mix, and the Museum is developing plans for a new suite of Energy Galleries to offer a greater focus on low carbon energy sources. A main element of the Museum's plans is to develop relationships with industry stakeholders and the North West Energy Forum is delighted to be hosting this event to facilitate introductions to its network of energy professionals.

15:30 Annual General Meeting

16:00 Registration, refreshments and networking

16:30 Welcome & scene setting
President, North West Energy Forum

16:40 Energy Galleries at the Museum of Science and Industry: Future Plans
John will give an overview of the existing Electricity, Gas and Power galleries at the Museum and will introduce plans for a new suite of Energy Galleries. This presentation will provide an opportunity for energy professionals from the North West to play an active role in the development MOSI's future plans.
